Email: noel@toivio.se

Current residence: Malmö, Sweden

I believe the best games are made when we feel encouraged to not only elevate the quality of our own disciplines, but of the game as a whole.

Work Experience

August 2020 - Present
Experienced Game Designer
Flashbulb Games in
Copenhagen

I shipped two titles on all major platforms and iterated on live content, with ownership over combat & player onboarding.

On **Trailmakers 2.0: Pioneers** (Multiplayer Co-op Open-world Vehicle Builder):

- Led Combat Design creating weapons & gunplay systems, AI systems and combat encounter level design.
- Led Onboarding & First-Time User Experience, refined through playtesting and team input.
- Tuned game balance across the whole game, adjusting weapon stats to resource drop rates with live player data.

On **Rubber Bandits** (Multiplayer Co-op & PvP Party Brawler):

- Designed the player progression system and shop items.
- Scripted prototypes and implemented features including power-ups, modifiers and weapons.
- Released multiple post-launch updates, further improving the quality of the game.
- Owned 50% of level design, iterated based on testing & feedback.

Additionally, I represented the design team at TGA Meet & Greet (2023 & 2024) and onboarded interns into the company.

August 2017 - March 2018
Freelance Level Designer
Approe in Stockholm

On **Bubble Breeze Pop** (Bubble Shooter for Mobile):

- Designed over 150 levels and continuously refined player retention.
- Took part in developing player power-ups with game designers.
- Helped develop the in-house level editor.

Education

August 2018 - August 2020
The Game Assembly - *Higher Vocational Education*
Level Design Program Graduate
Malmö, Sweden

- I made 8 games in teams of up to 13 people at the school.
- The program was designed in collaboration with games industry representatives.
- The education has won multiple awards and is considered a top design and game-developing school by The Rookies.

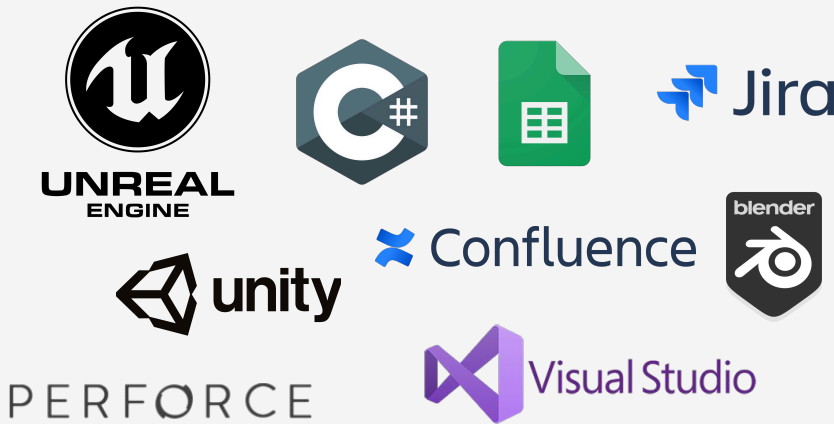

2014 - 2018
KLARA Södra - *Upper Secondary Education*
Game Development (Technical Program) Graduate
Stockholm, Sweden

- In the Klara Game Awards I was honored with the Best Design award for my solo-developed prototype fighting game Sumo Ball.
- By the end of the education I received a diploma for Game Developer of the Year.

Languages

Swedish: Native
English: Fluent
Finnish: Native
Japanese: Proficient in speaking, intermediate in writing (JLPT - Level 3)

Software

Non-Profit

2019
Nordic Game Conference
Volunteer
Malmö, Sweden
